

Q4 2024 | FACTSHEET

Inspire FuturePath Portfolios

About Inspire FuturePath Portfolios

At Inspire Investing, we champion the principles of Biblically Responsible Investing (BRI). Our strategies are designed to align with biblical values, empowering investors to make a positive impact on the world while maximizing return potential.

Central to our approach is the revolutionary Inspire Impact Score methodology. This objective, rules-based system evaluates companies based on their adherence to biblical values and their overall positive impact on customers, communities, employees, and the world. Companies receive scores ranging from -100 to +100, with +100 representing the highest possible alignment with our criteria.

Only companies with neutral or better Inspire Impact Scores are included in our portfolios.

Inspire FuturePath 2025 *Conservative*

This strategy seeks risk-adjusted growth for a target retirement date of 2025. This strategy adjusts diversification across US Large Cap, US Mid Cap, US Small Cap, International Developed, Emerging Markets, and US investment grade corporate bonds as it approaches the target retirement date.

Inspire FuturePath 2030 *Moderate*

This strategy seeks risk-adjusted growth for a target retirement date of 2030. This strategy adjusts diversification across US Large Cap, US Mid Cap, US Small Cap, International Developed, Emerging Markets, and US investment grade corporate bonds as it approaches the target retirement date.

Inspire FuturePath 2035 *Moderate*

This strategy seeks risk-adjusted growth for a target retirement date of 2035. This strategy adjusts diversification across US Large Cap, US Mid Cap, US Small Cap, International Developed, Emerging Markets, and US investment grade corporate bonds as it approaches the target retirement date.

Inspire FuturePath 2040 *Moderate*

This strategy seeks risk-adjusted growth for a target retirement date of 2040. This strategy adjusts diversification across US Large Cap, US Mid Cap, US Small Cap, International Developed, Emerging Markets, and US investment grade corporate bonds as it approaches the target retirement date.

Inspire FuturePath 2045 *Aggressive*

This strategy seeks risk-adjusted growth for a target retirement date of 2045. This strategy adjusts diversification across US Large Cap, US Mid Cap, US Small Cap, International Developed, Emerging Markets, and US investment grade corporate bonds as it approaches the target retirement date.

Inspire FuturePath 2050 *Aggressive*

This strategy seeks risk-adjusted growth for a target retirement date of 2050. This strategy adjusts diversification across US Large Cap, US Mid Cap, US Small Cap, International Developed, Emerging Markets, and US investment grade corporate bonds as it approaches the target retirement date.

Inspire FuturePath 2055 *Aggressive*

This strategy seeks risk-adjusted growth for a target retirement date of 2055. This strategy adjusts diversification across US Large Cap, US Mid Cap, US Small Cap, International Developed, Emerging Markets, and US investment grade corporate bonds as it approaches the target retirement date.

Inspire FuturePath 2060 *Aggressive*

This strategy seeks risk-adjusted growth for a target retirement date of 2060. This strategy adjusts diversification across US Large Cap, US Mid Cap, US Small Cap, International Developed, Emerging Markets, and US investment grade corporate bonds as it approaches the target retirement date.

Inspire FuturePath 2065 *Aggressive*

This strategy seeks risk-adjusted growth for a target retirement date of 2065. This strategy adjusts diversification across US Large Cap, US Mid Cap, US Small Cap, International Developed, Emerging Markets, and US investment grade corporate bonds as it approaches the target retirement date.

Source: Inspire Investing as of December 31, 2024. The allocations in the charts above reflect portfolio weights for equity, fixed income, and cash asset classes across the spectrum of risk-based model portfolios and active portfolios. Allocations are as of the date indicated, are subject to change, and should not be relied upon as current thereafter. Equity asset classes include, but are not limited to, domestic equity and international equity. Fixed income asset classes include investment grade corporate bonds.

Important Disclosure: The model portfolios primarily utilize ETFs that make payments to Inspire Investing, LLC or its affiliates (collectively "Inspire") for advisory or other services, which presents a conflict of interest for Inspire.

The S&P Target Date Indexes are designed to track the performance of multi-asset portfolios aligned with target retirement dates ranging from 2025 to 2065 respectively. These indexes allocate to equities and fixed income at varying levels, according to a pre-determined schedule related to the respective target retirement date. The performance of the S&P Target Date Indexes includes the reinvestment of dividends and interest income after the deduction of withholding taxes but does not reflect fees, trading costs, or other expenses.

August 1, 2024 for Inspire FuturePath 2055.

Performance returns for periods of less than one year are not annualized. All periods longer than one year are annualized.

Important Performance Reporting Information: Past net performance is no guarantee of future results. Investors cannot invest directly in an index and unmanaged index returns do not reflect any fees, expenses or sales charges. Cumulative performance is the total holding period rate of return of an investment from the start date to the current report date. Annualized performance is the return an investment provides over a period of time, expressed as a time-weighted annual percentage for periods shorter and longer than 1 year. The U.S. Dollar is the currency used to express performance. Inspire claims compliance with the Global Investment Performance Standards (GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.). To receive a GIPS report and/or our firm's list of composite descriptions please email your request to inspire@inspireinvesting.com. Composite and benchmark/index performance results reflect realized and unrealized appreciation and the reinvestment of dividends, interest, and/or capital gains. Taxes have not been deducted. Gross composite returns do not reflect actual performance because they do not reflect the deduction of any fees or expenses. Such fees that a client may incur in the management of their investment advisory account may reduce the client's return. The "net of fees" performance figures reflects the deduction of an investment advisory fee but do not reflect the deduction of custodial fees, platform fees or brokerage commissions. Net composite returns reflect the deduction of an annual fee of 3% typically deducted monthly or quarterly. Due to the compounding effect of these fees, annual net composite returns may be lower than stated gross returns less stated annual fee. Index returns do not reflect transaction costs, or the deduction of fees and it is not possible to invest directly in an index. You should consult with your advisor to learn more about the fees that will be applied to a particular account or type of account. The performance of accounts managed by a third party advisor and other third parties; the advisor's decision to exercise its discretion to implement a given strategy in a way that differs from the information provided by Inspire; the timing of the advisor's implementation of strategy updates; investor imposed investment restrictions; and the timing and nature of investor initiated cash flow activity in the account may cause actual performance to differ substantially from reported performance. There is no guarantee that any of the investment strategies will be successful, and investors should be aware that returns reflect capital gains and losses, income, and the reinvestment of dividends.

Glossary

Sharpe Ratio A measure for calculating risk-adjusted returns that has become the industry standard for such calculations. It was developed by Nobel laureate William F. Sharpe. The Sharpe ratio is the average return earned in excess of the risk-free rate per unit of volatility or total risk. The higher the Sharpe ratio the better.

Standard Deviation A statistical measure of volatility that quantifies the historical dispersion of a security, fund or index around an average. Investors use standard deviation to measure expected risk or volatility, and a higher standard deviation means the security has tended to show higher volatility or price swings in the past. As an example, for a normally distributed return series, about two-thirds of the time returns will be within 1 standard deviation of the average return.

Jensen Alpha A risk-adjusted performance measure that measures an investment's returns relative to its benchmark's returns. This figure is calculated using the capital asset pricing model (CAPM).

Beta A measure of an investment's volatility relative to its benchmark. An investment is considered more volatile than the benchmark if it has a beta greater than 1.0 and less volatile if it has a beta less than 1.0. A beta of 1.0 would represent parity with the benchmark in terms of volatility.

Important Risk Information

Inspire Investing and its affiliates have not taken into consideration the circumstances of any particular investor in producing this material and are not making an investment recommendation or acting in a fiduciary capacity in connection with the information provided herein. Past performance is no guarantee of future results. It is not possible to invest directly in an index. FOR PROFESSIONAL USE ONLY

BEFORE INVESTING, CONSIDER THE FUNDS' INVESTMENT OBJECTIVES, RISKS, CHARGES AND EXPENSES. TO OBTAIN A PROSPECTUS WHICH CONTAINS THIS AND OTHER INFORMATION, CALL 877.658.9473, OR VISIT WWW.INSPIREETF.COM. READ IT CAREFULLY.

Inspire ETFs are distributed by Foreside Financial Services LLC, Member FINRA.

Investment advisory services offered through Inspire Investing, LLC, a Registered Investment Advisor with the SEC. Inspire and Foreside Financial Services LLC are not affiliated.

Investing involves risk including the risk of loss of principal. Although steps can be taken to help reduce risk it cannot be completely removed.

ETFs trade like stocks, are subject to investment risk, fluctuate in market value and may trade at prices above or below the ETFs' net asset value. Brokerage commissions and ETF expenses will reduce returns.

Asset allocation is a method of diversification which positions assets among major investment categories. While asset allocation may help reduce the investment risk, it does not ensure a profit or guarantee against a loss.

Diversification does not ensure a profit or guarantee against loss.

Actively managed model portfolios do not seek to replicate the performance of a specified index. An actively managed model portfolio may underperform its benchmark. An investment in the model portfolio is not appropriate for all investors and is not intended to be a complete investment program. Investing in the model portfolio involves risks, including the risk that investors may receive little or no return on the investment or that investors may lose part or even all of the investment.

Carefully consider the funds within the model portfolios' investment objectives, risk factors, and charges and expenses before investing. This and other information can be found in the funds' prospectuses, and if available, the summary prospectuses which may be obtained by visiting respective fund family websites. Read the prospectus carefully before investing.

Foreign (non-US) securities may be subject to greater political, economic, environmental, credit and information risks. Foreign securities may be subject to higher volatility than US securities, due to varying degrees of regulation and limited liquidity. These risks are magnified in emerging markets.

Bonds generally present less short-term risk and volatility than stocks, but contain interest-rate risk (as interest rates rise, bond prices usually fall); issuer default risk; issuer credit risk; liquidity risk; and inflation risk. These effects are usually pronounced for longer-term securities. Any fixed income security sold or redeemed prior to maturity may be subject to a substantial gain or loss.

The information provided does not constitute investment advice and it should not be relied on as such. It should not be considered a solicitation to buy or an offer to sell a security. It does not take into account any investor's particular investment objectives, strategies, tax status or investment horizon. You should consult your tax and financial advisor.
